#### **DETAILED ACTION**

Page 2

### Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Some text appears to have been left out of the first two lines of claim 1. Applicant appears to be conditioning fibers with a composition which contains at least 40% of nonionics, rather than conditioning fibers which contain at least 40% nonionics. Claims 7, 10 and 11 lack antecedent basis for the recitation of "the fatty acid" and "the dicarboxylic acid". These are exemplary. In claim 3, it is not clear whether applicant wishes to claim succinic acid, etc., or oligomerized succinic acid, etc. Examiner has assumed the former, and has examined the claims on that basis. In claim 15, there should be a comma after "sorbitan monoester".

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 2, 4, 5, 7, 10, 11-14 and 16-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 96/35661. See Examples. Exemplified hair sprays

Application/Control Number: 10/602,401 Page 3

Art Unit: 1751

condition hair, a well known fiber, as would the liquid soap of Example 10. Citric acid, a triacid, meets the broadest reasonable definition of a substituted acid as recited in claim 1.

### Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/602,401

Art Unit: 1751

Claims 1-5, 7-9 and 12-19 are rejected under 35 U.S.C. 103(a) as being 8. unpatentable over WO 96/35661. The reference discloses surfactants obtained by esterifying di- or tricarboxylic acids with aliphatic alcohols, esterifying or amidating with alkanolamines and quaternizing the resulting products (abstract). Suitable alcohols are of 1-22 carbons (p. 2, bottom), alkanolamines are described in the middle of p. 3, and acids are described in the middle of p. 5. Use of tallow alcohol, of natural origin, is exemplified. To the extent that claim 7 can be understood, these ratios appear to be exemplified. Regarding claims 8 and 9, no specific ratio of acid to alkanolamine is disclosed, but the examiner takes the position that the exemplified ratio of 1:1 is so close to what is recited in these claims that the person of ordinary skill in the surfactant art would expect similar results. Quatting with dimethyl sulfate is exemplified. Compositions comprising more than 40% of the recited nonionics are exemplified, and it would be obvious to use them on fiber, as this is disclosed at the bottom of p. 9. This reference differs from the claimed subject matter in that it does not disclose a composition which reads on all of applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

Application/Control Number: 10/602,401

Art Unit: 1751

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

- 9. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Dr. Yogendra Gupta, may be reached at (571) 272-1316.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

Art Unit: 1751

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
